1. Organization Overview

Name: Sweet Crumb Bakery

Sweet Crumb Bakery is a small, family-run bakery specializing in fresh artisan bread, cakes, and pastries made daily from scratch. Located in a local community, the bakery has built a loyal customer base through word-of-mouth but currently has no online presence.

Mission

To bring fresh, handmade baked goods to the community every day, using quality ingredients and traditional techniques.

Vision

To become the neighborhood's go-to bakery for both everyday treats and special occasion cakes.

Target Audience

Residents, office workers looking for lunch and coffee treats, and customers seeking custom celebration cakes.

2. Website Goals and Objectives

The website aims to increase walk-in and online orders, showcase the product range, and allow customers to enquire about custom cake orders.

Key Performance Indicators (KPIs)

- Number of cake enquiry submissions
- Website traffic
- Repeat visits to the online menu

3. Current Website Analysis

Not applicable. Sweet Crumb Bakery has no existing website; it currently relies only on foot traffic and word-of-mouth.

4. Proposed Website Features and Functionality

- Homepage (index.html) — hero image, welcome message, and call to action
- About Us (about.html) — bakery history, team, and baking philosophy
- Products (products.html) — full menu of breads, cakes, and pastries with descriptions and prices
- Enquiry (enquiry.html) — custom cake order form with occasion and flavor options
- Contact (contact.html) — location, opening hours, contact form, and embedded map

5. Design and User Experience

Color Scheme

Warm browns and creams with a soft pink accent, evoking a cozy, homemade feel.

Typography

A friendly serif for headings paired with a clean, easy-to-read sans-serif for body text.

Layout and Design

An appetizing, photo-led layout with a browsable product menu, generous white space, and clear category sections so customers can quickly find bread, cakes, or pastries.

User Experience Considerations

- Simple navigation with no more than five main menu items
- Mobile-friendly product images
- A prominent ‘Order a Cake’ button on every page

6. Technical Requirements

The website will be built using HTML, CSS, and JavaScript, hosted with a standard web hosting provider under a custom domain (e.g. www.sweetcrumbbakery.co.za).

7. Timeline and Milestones

- Part 1 – HTML Structure and Planning: due 14 August
- Part 2 – CSS Styling: due in a subsequent submission
- Part 3 – JavaScript Functionality: due in a subsequent submission

8. Budget

- Domain registration: approximately R200 per year
- Web hosting: approximately R900 per year
- Ongoing maintenance: approximately R500 per year
